

Church Registration & Team Management System

Installation Guide

Requirements

Node.js 20+, npm, MongoDB local or Atlas, and a Cloudinary account.

Install Dependencies

Run `npm install` in the project folder.

Create Environment File

Copy `.env.example` to `.env` and fill your private values.

Database

Use a local MongoDB URI or a MongoDB Atlas connection string.

Cloudinary

Add `CLOUDINARY_CLOUD_NAME`, `CLOUDINARY_API_KEY`, and `CLOUDINARY_API_SECRET`.

Security

Use a long `SESSION_SECRET` and a strong `ADMIN_PASSWORD`.

Create First Admin

Run `npm run seed` after editing `.env`.

Start App

Run `npm start` and open `http://localhost:3000`.

Production Notes

Use HTTPS, set `NODE_ENV=production`, add environment variables in your host dashboard, and back up your database regularly.

Example .env

```
PORT=3000
MONGODB_URI=mongodb://127.0.0.1:27017/church_registration_app
SESSION_SECRET=replace_with_a_random_secret_at_least_32_characters
ADMIN_PHONE=01000000000
ADMIN_PASSWORD=ChangeThisStrongPassword123!
CLOUDINARY_CLOUD_NAME=your_cloud_name
CLOUDINARY_API_KEY=your_api_key
CLOUDINARY_API_SECRET=your_api_secret
```
